# ADVANCED CUSTOMIZATION REMAINS AVAILABLE

- ✓ Toric & Multifocal Optics
- ✓ Diameter
- ✓ Quadrant-Specific
- ✓ Multi-Meridian
- ✓ Precision Lift & Notching
- ✓ HOA Correction
- ✓ Prism
- ✓ Center Thickness
- ✓ Fenestration

# FIT SET

# FULL RANGE OF PATIENTS

**LESS LENSES = LESS CHAIRTIME!**

There are 6 spherical & 6 toric lenses with two options of toricity available for initial fit - 200µ & 400µ.

**16.5 DIAMETER THAT'S FULLY CUSTOMIZABLE**

The Europa Tangent diameter can be completely customized from a 15.0 to 22.0mm diameter!

## Contour Curve Technology

The Tangent design's contour curve lives within the transition zone and can modify your fit into a prolate or oblate shape.

This enhancement is derived from profilometry data and allows optimization of patient's ocular health by fine tuning the fit over the limbus.

# WHY VISIONARY OPTICS?

Visionary Optics is exclusively dedicated to scleral lens fitting, design, and manufacturing and is a leader in the industry with **over 20 years of experience**.

**94%**

**SUCCESS RATE<sup>1</sup>**

Our commitment to you (including a risk-free warranty) is a successful scleral lens fit for you & your patients.

**10,000+**

**PROFILOMETRY FITTINGS**

We helped to develop the scleral shape classification system<sup>2</sup> that has been accepted by the worldwide scleral lens community.

**1-2 DAY**

**TURNAROUND**

Simplify your fitting process with personalized support. We understand your time is extremely valuable.

Visionary Optics has been an incredible lab to work with from day one. The lenses they design are incredibly well-made, and their customer service is 5-star. ”

# LANDING PROFILE

## Latitude

Free-form, fully-customized, scleral lens designed using profilometry data.

## Europa Tangent

Has one landing zone curve designed to follow the natural slope of the scleral surface and reduce compression & blanching.

## Europa (Standard)

One of the most trusted products in scleral lens design with a four peripheral curve landing zone.

## PATTERNED AFTER OUR *FREE-FORM DESIGN*

The Europa Tangent design offers a smoother, softer transition to the landing zone, patterned after Visionary Optics' freeform Latitude lens.

We developed our Tangent design fitting algorithm using our extensive and exclusive knowledge of scleral shape patterns<sup>2</sup> with the goal of continuously sharing our knowledge with our partnering doctors.

## OUR KNOWLEDGE IS YOUR POWER

***Europa (Standard)***

16.0mm

***Europa Tangent***

16.5mm

## COMPRESSION IS A COMPLICATION. LET THE EUROPA TANGENT HELP!

The Europa Tangent is designed to offer better overall patient comfort (less patient dropout!) & reduces suction from compression and settling throughout a full day's wear time (aids in easier removal).
